## Examiner's Statement of Reasons for Allowance

- 1. Claims 1-4, and 4-9 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

The prior art made of record fails to anticipate or make obvious the claimed invention. Specifically, the prior art fails to teach, in combination with the remaining elements as recited in claim 1:

The present invention is directed to a radiation diversity antenna structure.

Regarding claim 1, the prior art of record does not anticipate, nor does it suggest, the "radiation diversity antenna structure" as now claimed in amended claim 1, the only independent claim. Specifically, the prior art does not show or suggest at least the last two limitations in the claim of "a line feed coupled to the middle of the first arm" and "a switching means positioned in the at least one second arm to control the coupling of the first and second arms with the line feed", alone or in combination with the other limitations of the claim. Further, while Sievenpiper (6,864,848), the closest prior art, does disclose a feed line (34 in Figs. 11a-b, for example) and a switching means (18), these are not located in the locations claimed and are there is no obvious reason to relocate these items of the reference without changing the operation of the reference. Also, see pages 5-7 of applicant's remarks for additional reasons why the claims distinguish over the prior art.

Claims 2-4, and 6-9 are allowed for depending on claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 2821

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

Inquiries

3. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Huedung Mancuso whose telephone number is (571) 272-1939.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Douglas Owens, can be reached on (571) 272-1662. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

4. Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
